This declaration version states that AI tools or outputs contributed materially to the process or final work, while human creative contribution remained material and was identified in the declaration.
Current ACC rules do not retroactively change the meaning of the recorded statement or this record's category.
The person submitting the declaration is responsible for its content. ACC links it to the recording and shows whether the blockchain timestamp is awaiting confirmation. Once confirmed, the timestamp lets you check that the recorded data has not changed. It does not prove that the declaration is true.
These classes describe declared origin, not artistic quality, copyright ownership or legal clearance.
Email confirmation establishes mailbox control, not authorship, rights or official identity.
